

## Training Professional Security Assets Around The World

### THE TAYLOR GROUP PROFESSIONAL TRAINING PORTFOLIO

Evidence of our success may be seen, across the globe, in such diverse regions as Asia, Middle East, West Africa, South America and Caribbean, not to mention the United States of America.

Years of on-the-ground experience, since 1987, have provided The Taylor Group with the wealth of information we have developed and formalized into a practical training curriculum. We specialize in custom curriculum development and training that meets or exceeds all Public Safety and Industry Certification Standards, globally.

Listed here is a partial selection from a broad range of training techniques, used in various combinations, to upgrade our clients' current security status or to solve specific problems.

We invite you to review the curriculum, on background, in order to become familiar with the depth of our knowledge, the quality of our training techniques and the precision with which we manage a challenge.

Call us to discuss the courses that you see listed as being useful to your current status or to consult with us regarding a unique situation requiring a customized solution.

Robert E. Taylor, Jr.  
Executive Vice President /  
Master Trainer  
Office: +1844-808-4909

Tactical Shotgun Instructor Development	26
Use of Force/Use of Deadly Force	26
(V.e.S.T.) Vehicle Stop Tactics	27
Winning: Use of Force	27

## Above Normal Ground Level Operations (ANGLO): Tower Climbing/Safety and Rescue

The overall format for this program is designed to take the attendee from the very basics to advanced level rope related operations and in applicable to the following audiences: Law enforcement, Fire fighters, Emergency service personnel, Search & Rescue personnel, and Tactical officers.

The goal of the training program is to prepare the attendee to establish, conduct and manage the technical and mechanical aspects of technical rope work, from initial response through final disposition.

This program is specifically designed for law enforcement, private security, military personnel, and public safety personnel who require a functional and operational knowledge of basic through advanced rope work, including rope rescue techniques. Additionally, this program is designed to provide a solid understanding of the principles of safe tower climbing operations, rescue operations related to operations on and around towers,. Practical application exercises and hands on application are combined with classroom training.

## Active Shooter, Patrol Office Response

The reality of any jurisdiction of any size experiencing an Active Shooter event (where one or more criminal or terrorist suspects intentionally engage in indiscriminant violent conduct that may result in multiple deaths of innocents) can no longer be reasonably denied. These events have occurred in the largest urban settings as well as remote rural communities. This course provides unique and must-have training for your officers to more safely and effectively respond to these tragic events, thereby mitigating the carnage inherent in this type of incident.

The goals of this course are several:

- To provide the patrol officer with the recent historical and tactical evolution of the “Active Shooter” phenomena, as well as the recent history of terrorist attacks and mass casualty assaults.
- To provide the beat/street officer with the real-world skills and tactics necessary for the quick intervention and mitigation of the *typical* criminal “Active Shooter” incident.
- To provide the patrol officer with the real-world skills and tactics necessary for the quick intervention and mitigation of the terror attack where one or more teams of military trained individuals are conducting raid-type, indiscriminate attacks throughout the city or region.
- To provide the officer with a method of conducting immediate rescues and deploying into an on-going situation in a small team for the purpose of segregating or neutralizing the continuing threat.

## Advanced Evidence Processing Technique

This is an intensive, hands-on workshop for officers, crime scene investigators, forensic scientists, fingerprint examiners, firearms experts and advanced students with prior experience in processing techniques. Each participant is given a number of items to process with the various methods listed below. Everyone will be required to not only process the items, but to document the evidence, the processes used and the steps taken in order to achieve the best results for that particular item. The student will then recover the evidence that

was developed i.e. fingerprints or trace evidence, preserve it and properly package and record the results and the items processed for submission to a property/evidence room, laboratory or courtroom setting.

By the end of the workshop, participants will have a more thorough working knowledge of the order that is followed when processing items. Participants will also have an understanding of how to use the various processing methods and materials as well as the ability to photograph, recover, lift and document the evidence they have developed.

## Advanced Instructor Development

The goal of the training program is to prepare the academy and in-service instructor to conduct and manage productive and effective training programs and functions beyond basic level instruction. Additionally, the course is designed to give the student instructor a practical base of understanding of advanced training methods like imagery, simulation and stimulus-response training. Students successfully completing this course will be certified to train personnel in advance instructor development techniques.

The course will be directed at a functional understanding of the principals of adult education and educational psychology. Several areas will be addressed; each area by itself is an area of expertise requiring detailed individual course instruction.

This course is not a basic method of instruction or general instructor certification module. The AID program is an advanced program intended for those individuals who are currently functioning as an instructor and want to maximize their ability to effectively transfer knowledge to their students. In addition, this program is also designed to help participants increase their knowledge and application of curriculum development, program assessment and adult learning techniques.

## Advanced Latent Fingerprint Recovery & Comparisons

The study of the recovery of latent fingerprints from the scene of a crime is one of the most important avenues of evidence recovery available to modern day law enforcement. A single fingerprint properly recovered can make or break any important case. Repeatedly the police and prosecutors have depended on that best evidence, a Latent Fingerprint. Even more vital is the comparison of these recovered Latent Fingerprints with known standards, thus making the case and putting the criminal behind bars.

### Training Goals and Objectives

This course will explore the avenues of Latent Fingerprint Recovery, Comparison, and Court Testimony, with emphasis on Latent Fingerprint processing techniques, Latent Fingerprint recovery techniques, and latent Fingerprint recovery techniques through photography and Latent Fingerprint comparisons with known standards.

This course in will teach the general procedures that apply to all types of latent fingerprint identification, whether they are homicide, suicide, rape, burglary, robbery or arson. This is an intermediate to advanced skills development course

designed for the law enforcement, crime scene technicians, latent fingerprint examiners, and investigators in the comparison and recovery of latent fingerprint evidence.

## Aerosol Chemical Munitions Trainer

This course is specifically designed for the existing law enforcement, private security, or military instructor who may require an instructor certification in aerosol chemical munitions or an enhanced knowledge of the application of

chemical agents and use of force in critical, real world situations. Additionally, this course is designed to provide a solid understanding of adult education and methods of instruction as they pertain to the field of aerosol chemical agents, use of force and force application.

Students will also learn acceptable and legally defensible methods of subject control, use of force, agent deployment and retention. Practical application exercises are combined with stimulus/response conditioning principals and the development of a winning mindset.

## Basic Crime Scene Investigations

This course is designed to teach the new crime scene investigator in determining which processing techniques will provide the best results in obtaining evidence from scenes and items. Students will use techniques and methods to process, photograph, recover and package evidence in a manner consistent with established legal and departmental requirements.

The students will be provided a Training Manual, visual and verbal instructions and demonstrations of proper techniques in the processing and photographing of evidence and scenes.

Students are expected to participate in class discussion, skills demonstrations and through related personal experience. They will also be able to practice the techniques learned in the processing of items for latent fingerprints and scenes. Students will complete this training with a working knowledge of current techniques and processes. Finally, they will be able to identify scenes, evidence and have sufficient training materials available for reference.

## Basic Fingerprint Classification and Comparison (5 Days)

In this course, the student will learn the fundamental techniques of fingerprint pattern interpretation and how this information is used to accurately classify,

search and file a criminal record. This course is taught with numerous methods of classroom instruction combining lectures with hands-on assignments, questions and answers, reinforcing quizzes and a final examination.

Although automated fingerprint identification is changing the methods of criminal record keeping, the Henry Classification System remains the backbone of law enforcement record identification. This training is vital for any individual who wishes to pursue a career in police criminal identification.

This course will teach the general procedures that apply to all types of latent fingerprint identification, whether they are homicide, suicide, rape, burglary, robbery or arson. This is an intermediate to advanced skills development course designed for the law enforcement, crime scene technicians, latent fingerprint examiners, and investigators in the comparison and recovery of latent fingerprint evidence.

## **Bloodstain Pattern Analysis and Interpretation for Investigators (BASIC) IAI Approved**

A pre-requisite to International Association for Identification certification course designed to assist crime scene technicians, detectives and forensic investigators in the recognition, documentation and evaluation of bloodstain patterns when processing those scenes involving bloodshed. Reconstruction of a crime scene requires accurate description and documentation of all evidence observed and collected. This program introduces a clear understanding of resources and techniques available to allow them to document reconstruct and describe in detail a crime involving bloodshed.

### **Training Goals:**

1. To be able to recognize and identify bloodstain pattern evidence at the scene.
2. To learn to properly document and preserve bloodstain evidence.
3. Learn the proper interpretation of the bloodstain evidence and patterns; prepare and render an expert opinion concerning that interpretation.

## **Buried Bodies and Surface Skeletons**

This course can be modified to the level of expertise in the audience and can be adapted in the classroom for multiple levels of experience and understanding. The goal of the training program is to prepare police officers, crime scene investigators, medical Examiner's investigators, pathologists, and detectives in the proper investigation, documentation, and recovery of human remains and associated artifacts involving both clandestine graves and surface skeletal remains. This course is intended for various levels of experienced law enforcement officers and detectives and forensic personnel. The intent of the trainer is to provide both classroom and field training in the proper recovery and documentation of human remains and artifacts from the crime scene.

## **Close Protective Operational Tactics - Level 1**

This is an advanced skill development course designed for the armed professional engaged in protective services operations. During this block of instruction, the student will receive a practical base of knowledge in the dynamics of protective operations and techniques for successful management

of such details. Further, the attendee will receive training in the efficient and effective use of the duty handgun, pistol and/or revolver in environmental conditions similar to those experienced during a protective service detail, to include; close quarters shooting, shooting in and around vehicles and shooting from unconventional positions.

This program is presented in a contemporary and legally defensible format. Response skills will be developed through simulated force application situations and dynamic range exercises. The course will be directed at a multi-agency/multi-disciplinary approach to protective service operations. Several areas will be addressed; each area by itself is an area of expertise requiring detailed individual course instruction.

## Close Protective Service Operations Level 2

This is an advanced still development course designed for the armed professional engaged in protective services operations. During this block of instruction, the student will receive a practical base of knowledge in the dynamics of protective operations and technique for successful management of such details. Rather, the attendee will receive training in the efficient and effective use of the duty handgun, pistol and/or revolver in environmental conditions similar to those experienced during a protective service detail, to include; close quarters shooting, shooting in and around vehicles and shooting from unconventional. This program is presented in a contemporary and legally defensible format. Response skills will be developed through simulated force application situations and dynamic range exercises.

The course will be directed at a multi-agency/multi-disciplinary approach to protective service operations. Several areas will be addressed; each area by itself is an area of expertise requiring detailed individual course instruction.

This is an advanced skill development course designed for the armed professional currently engaged in tactical operations or initiating a tactical program, at the law enforcement or military level.

## Collapsible Baton Trainer

The goal of the training program is segmented in two parts. First, to certify participants in the Basic certification-training format or recertify those operators who have not had an opportunity to re-train. The second part of the program is to develop instructor to prepare and condition the future attendees to safely instruct in the wear,

carry, and deployment of the ASP Baton and other expandable batons as an intermediate weapon to neutralize aggressive / physical behavior, subject control, containment, and threat neutralization techniques in both the patrol and tactical environments. The program will establish foundations in the understanding of use of force, reasonable expectations and applications to gain subject compliance.

## Collapsible Baton & Defensive Spray Trainer

The goal of the training program is segmented in two parts. First, to certify participants in the Basic certification-training format or recertify those operators who have not had an opportunity to re-train. The second part of the program is to develop instructor to prepare and condition the future attendees to safely instruct in the wear, carry, and deployment of the ASP Baton and other expandable batons as an intermediate weapon to neutralize aggressive / physical behavior, subject control, containment, and threat neutralization techniques in both the patrol and tactical environments. The program will establish foundations in the understanding of use of force, reasonable expectations and applications to gain subject compliance.

The training courses is dedicated to the exploration of the industry accepted collapsible baton systems, and defensive sprays used in subject control. Day 3 will be devoted to instructor development, static, dynamic proficiency examinations and confrontational drilling.

## Computer Crime Investigation Workshop

This course is designed as a “hands-on” workshop designed to develop applicable skills in the area of computer crimes, including detection, investigation, analysis, recovery and protection of networks. Students will develop abilities in the procedures of computer related intrusion, theft, unauthorized examination, and sexual related exploitation.

The goal of the training program is to prepare and condition law enforcement officers in an extensive practical computer forensic learning workshop designed

to provide skills related to internet technology, investigative tactics, forensic evidence analysis, and network security for corporate security.

This is an intermediate / advanced skill development course designed for the Forensic Crime Scene, Evidence Collection Personnel, Criminal Investigators and elite corporate network security professionals interested in learning enhanced skills related to identification, collection, preservation and investigation of forensic computer crimes and exploitation.

## Courtroom Security Operations

This course is specifically designed for the existing law enforcement or private security professionals who require an enhanced knowledge of the dynamics and responsibilities of conducting and maintaining courtroom security operations with an emphasis on high-risk prisoner management. Further, this course provides a comprehensive exploration of contemporary security issues and events in and around the judicial system.

Additionally, this course is designed to provide a solid understanding of security and methods of implementation as they pertain to the field of court security, prisoner management/control and transportation, liability issues, and general physical security operations.

The course will be directed at a multi-agency/multi-disciplinary approach to protective service operations. Several areas will be addressed; each area by itself is an area of expertise requiring detailed individual course instruction.

This course either is limited to current law enforcement officers, private security specialists, and military personnel implementing a courtroom operations program or is currently engaged in security operations in and around the judicial system.

## Crime Scene Management for Patrol Officers

This course will teach law enforcement officers to control and manage a crime scene in a more effective way, using a standard operating procedure. The goal of the training program is to prepare the sworn law enforcement officers and civilian Crime Scene Investigators to manage any type of crime scene. A standard procedure will be introduced that officers may follow on all scenes. The instructor will discuss hazardous scenes, exigent circumstances, Collection tools and court testimony.

This course is intended for all law enforcement officers. Different scenarios will be introduced and discussed. Actual photographs of crime scenes will be shown. Class participation will be important, since the instructor will be leading a discussion of different crime scenes dealing with exigent circumstances, consent and search warrant issues. The instructor will discuss civilian crime scene investigators responsibilities compared to sworn officers during major crime scenes.

## Criminal Investigative Analysis / Criminal Profiling

This course will be modified to the level of expertise in the audience and can be adapted in the classroom for multiple levels of experience and understanding. The goal of the training program is to prepare the Investigator and Investigative Supervisor to conduct criminal investigative analysis, general profiling, and criminal profiling techniques.

In addition, the course will include an intense overview of criminal behavior and the understanding of behavior as it relates to the traditional forms of evidence, i.e., forensic, circumstantial, eyewitness and confession.

This course is intended for various experience investigators, evidence technicians, supervisors, and prosecution attorneys. It also has great value to the patrol officer and new recruit. The intent of the trainers is to bridge the learning gap obtained throughout a law enforcement career in the area of evaluating crime scenes and help the less experienced officer/investigator to avoid many of the mistakes and pitfalls experience by veteran officers as they progressed in their individual careers.

The goal of the training program is to prepare the sworn law enforcement officer, mental health officer, and emergency medical responder, social worker, and hospital personnel to understand and identify the behavior, techniques, and proper/lawful procedures in handling persons in mental health crisis. This training will also provide techniques in communication to de-escalate persons involved in difficult and dangerous situations.

This course is intended for various levels of experienced sworn law enforcement officer, mental health officer, and emergency medical responder, social worker, and hospital personnel. Students will learn recognition technique sol various mental health crises, develop communication skills in dealing with difficult situations enabling the ability to safely de-escalate the crisis, and obtain a working understanding of the laws pertaining to persons suffering from mental health, detailing the lawful actions to be taken.

## Death Scene Analysis and Cold Case Investigation

The goal of the training program is to prepare the Investigator and Investigative Supervisor to conduct and manage a Major Case Investigation from initial response through needed follow-up.

This course is intended for various experience investigators, evidence technicians, supervisors, and prosecution attorneys. It also has great value to the patrol officer and new recruit. The intent of the trainers is to bridge the

learning gap obtained throughout a law enforcement career in the area of evaluating crime scenes and help the less experienced officer/investigator to avoid many of the mistakes and pitfalls experience by veteran officers as they progressed in their individual careers.

### Defensive Tactics Trainer

The goal of the training program is to prepare and condition the attendee to safely apply weaponless subject control, containment and threat neutralization techniques in both the patrol and tactical environments and instruct/certify others in the application of these skills. Additionally, the course will concentrate on the application of alternative force application tools (less lethal) and impact weapons. Further, the program will focus on establishing an understanding of use of force, techniques to gain subject compliance, and to safely control individuals. Additionally, the program will heavily emphasize instructor development skills for the successful transfer of this type of information.

### Defensive Tactics Workshop

The goal of the training program is to prepare and condition the individual officer to safely apply subject control, containment and threat neutralization techniques in both the patrol and tactical environments. Additionally, the course will concentrate on the application of

alternative force application tools (less lethal) and impact weapons. Further, the program will focus on developing an understanding of use of force, techniques to gain subject compliance, and too safely control individuals.

This is an advanced skill development course designed for the first responder or first line supervisor, currently involved in public safety activities

### Developing Multi-Jurisdictional Task Forces for Major Crimes Investigations

The goal of the training program is to prepare the Investigator and Investigative Supervisor to conduct and manage a Major Case Investigation from initial response through needed follow-up.

The course will be directed at a multi-agency approach to a major investigation, specifically homicide/death investigations. Several areas will be addressed; each area by itself is an area of expertise requiring detailed individual course instruction.

In addition, the course will include an intense overview of criminal behavior and the understanding of behavior as it relates to the traditional forms of evidence, i.e., forensic, circumstantial, eyewitness and confession.

This course is intended for various experience

investigators, evidence technicians, supervisors, and prosecution attorneys. It also has great value to the patrol officer and new recruit. The intent of the trainers is to bridge the learning gap obtained throughout a law enforcement career in the area of evaluating crime scenes and help the less experienced officer/investigator to avoid many of the mistakes and pitfalls experience by veteran officers as they progressed in their individual careers.

## Digital Photography for Crime Scene Investigations

This course is designed to take the audience from the traditional historical methods of Crime Scene Photography to the present day technological advancements in multiple aspects of photography relating to Law Enforcement.

The goal of the training program is to educate the crime scene investigator, homicide detective, sworn law enforcement officer, rape detective, arson investigators, domestic violence investigator, and other law enforcement agency personnel in the aspects of digital photography.

The course will be focused on providing information and techniques to guide law enforcement agencies into the updated technological capabilities of digital photography and provide the skills needed to apply this technology in the crime scene investigation field and/or related areas.

This course is intended for various levels of experienced crime scene investigators, homicide detectives, sworn law enforcement officers, rape detectives, arson investigators, domestic violence investigators and other law enforcement agency personnel with a basic knowledge of photography. The intent of the trainer is to provide information on the tools and equipment used in digital photography. Introduce the student to the techniques used in the field and adapt the skills to successfully incorporate these techniques in their investigations.

## Diminished Light Tactics Trainer

The goal of the training program is to prepare the armed professional with a detailed and functional knowledge of conflict, tactics and weapons handling required for successful operation in a low light environment. The course will be directed at a multi-faceted approach to conflict and conflict resolution, specifically low light situations. Several areas will be addressed; each area by itself is an area of expertise requiring detailed individual course instruction. In addition, the course will include an intense overview of human behavior /

response and the understanding of behavior as it relates to training and human performance enhancement.

This course is specifically designed for the existing law enforcement, private security, or military firearms instructor who may require an enhanced knowledge of the application of diminished light tactics in conjunction with the use of firearms in critical, real world situations. Additionally, this course is designed to provide a solid understanding of adult education and methods of instruction as they pertain to the field of diminished light tactics, firearms, and force application. Students will also learn acceptable and legally defensible methods of subject control, use of force, and weapon retention. Practical application exercises are combined with stimulus/response conditioning principals and the development of a winning mindset.

### **Diminished Light Tactics Operator**

The goal of the training program is to prepare the armed professional with a detailed and functional knowledge of conflict, tactics and weapons handling required for successful operation in a low light environment. The course will be directed at a multi-faceted approach to conflict and conflict resolution, specifically low light situations. Several areas will be addressed; each area by itself is an area of expertise requiring detailed individual course instruction.

In addition, the course will include an intense overview of human behavior/response and the understanding of behavior as it relates to training and human performance enhancement.

This course is specifically designed for the existing law enforcement, private security, or military firearms instructor who may require an enhanced knowledge of the application of diminished light tactics in conjunction with the use of firearms in critical, real world situations. Additionally, this course is designed to provide a solid understanding of adult education and methods of instruction as they pertain to the field of diminished light tactics, firearms, and force application. Students will also learn acceptable and legally defensible methods of subject control, use of force, and weapon retention. Practical application exercises are combined with stimulus/response conditioning principals and the development of a winning mindset.

### **Dynamic Crisis Rescues Trainer**

The goal of this course is to introduce the student to the history of domestic crisis and on-going situations and the development of various forms of response to these situations. Further, to expose the student to various causal and contributing factors that complicate these types of calls for service. Additionally, to provide the student with a method of conducting immediate rescues and deploying into an on-going situation in a small team for the purpose of segregating or neutralizing the continuing threat.

This is an advanced skill development course designed for the first responder or first line supervisor, currently involved in public safety activities. Typical course attendees are; school resource officers, training officers, supervisors, and administrators.

## Dynamic High Risk Vehicle Stop Tactics

This is a fast paced, interactive advanced skill development course designed for the armed professional. In this program the attendee will receive a practical and functional base of knowledge in the most effective use of assigned weapons systems and tactics when dealing with; high risk vehicle stops, officer ambush/counter ambush, and counter carjacking situations. Students will also learn acceptable and legally defensible methods of subject control, use of force, and weapons manipulation. Practical application exercises combined with stimulus/response conditioning principals and the development of a winning mindset. This program is presented in a delivered in a contemporary and legally defensible format. The student will develop and define reactionary competence through simulated situations and demanding initiative based drills.

The course will be directed at a multi-agency/multi-disciplinary approach to protective service operations. Several areas will be addressed; each area by itself is an area of expertise requiring detailed individual course instruction.

This is an advanced skill development course designed for the armed professional currently engaged in tactical operations or initiating a tactical program, at the law enforcement or military level.

## Emergency Response to Critical Incidents (Domestic preparedness & response for first responders)

The goal of this course is to introduce the student to the history and development of emergency management and incident command. Further, to prepare the student to manage the various operational objectives of emergency management from a first responder or first line supervisor's perspective. Additionally, it is the goal of this course to expose the student to various scenarios and identified threats taken from current events and explore courses of action and the various impacts from those decisions.

The course will be directed at a multi-agency/multi-disciplinary approach to crisis management. Several areas will be addressed; each area by itself is an area of expertise requiring detailed individual course instruction.

This is an advanced skill development course designed for the first responder or first line supervisor, currently involved in public safety activities

## Excited Delirium and In-Custody Deaths

Law enforcement officers must learn to deal safely and effectively with people in a state of excited delirium. This course will give you the tools to save yourself, protect the subject, and save your department from the liability associated with an in-custody death.

The goal of the training program is to prepare the sworn law enforcement officer to do the following: recognize the symptoms of excited delirium, cocaine psychosis; learn guidelines and winning tactics for contact with people in a state of excited delirium, understand implications of the Taser and its use on people in such a state; familiarize with the "Suicide-by-Cop" phenomenon and its implications for law enforcement officers; properly document (report writing)

encounters with people in a state of excited delirium, whether it involves a use of force, or simply taking the person into custody under a mental health act; learn techniques for dealing with a subject in a heightened state of arousal who often possess 'superhuman' strength; and properly use the hobble restraint, an alternative to the dangerous 'hog-tie' method.

This course is intended for various levels of experienced sworn law enforcement officers and related personnel. The intent of the trainer is to provide survival tools and recognition techniques so that the student can effectively respond to the needs of a person in a state of excited delirium, while providing information geared toward officer and career survival in these types of encounters.

## Explosive Device and Bomb Recognition

The goal of the training program is to prepare the sworn law enforcement officer, general piece officer, emergency medical responder, emergency fire responder, or other public safety community servants' members to recognize and identify bomb or improvised explosive devices.

The course will be focused on providing information and techniques to identify devices and individuals that may develop these types of devices. Several areas will be addressed; each area by itself is an area of expertise requiring detailed individual course instruction.

This course is intended for various levels of experienced sworn law enforcement officers, public safety officers, emergency medical responders, emergency fire responders, administrative workers in the public safety field, or other related oriented response agencies. The intent of the trainer is to provide survival tools and recognition techniques so that the student can recognize the danger signs of explosive devices or persons that may develop these types of devices.

The course is designed as a one-day course. The students will learn the dangers that pose and the outcome of explosive devices. Depending on time allowances and if inert devices can be delivered because of transportation constraints, the students will witness devices in their actual state and understand how they are functioned. The course is designed to be conducted from 0800 to 1600 hours daily.

*Disclaimer: The course is designed to assist the public safety community in the recognition of Explosive Devices and Bomb Recognition ONLY! This course is not designed or intends to teach any student techniques or Render Safe Procedures (disruption of explosive devices). The Render Safe Procedure (RSP) is to be handled by a local accredited Bomb Squad, Bomb Technicians certified by the Hazardous Devices School & Redstone Arsenal or sponsored by the US Department of Justice*

## Extreme Close Quarters Conditioning (ECQC)

This program was developed over two decades of real world experience and close interaction with military, law enforcement & security professionals. This groundbreaking program exposes the attendee to the foundations & advanced concepts of close quarters environments & engagements. Going far beyond the various technique based systems that are provided by many training organizations, BCQC provides attendees with flexible & fluid methods of operating in dynamic and unpredictable environments. Much more than simply a shooting or movement course, EOQC focuses on proven principles, as well as the underlying processes that determine the outcome of a given situations.

The core principles of OQB/OOC, strategy, tactics, teamwork, bio-mechanics and timing are presented, tested and reinforced continuously throughout the SCQC Program. Participants are challenged both mentally and physically to solve complex situational problems utilizing flexible initiative based methods.

EOQC is a physically & mentally taxing program. Participants must come prepared with all required equipment and be prepared to work full days.

This is an advanced skill development course designed for the armed professional currently engaged in tactical operations or initiating a tactical program, at the law enforcement or military level.

## Tactical Handcuff Trainer

To provide the Police Agency Trainer with a total package of skills, knowledge, and tactical options sufficient to train police personnel in safe, yet practical methods of taking compliant, resistive, and assaultive or armed subjects into custody. This is a train-the-trainer physical skills course with broad officer safety implications to create safer, tactically sound arrest situations.

Major Instructional Areas and Objectives include: Teaching Physical Skills Training, Effective Combatives Problem-Solving®, Methods of Safer Real-World Arrest & Control, Current Safety Issues Involving Commonly Trained Arrest & Control, Real-World Takedowns of Resisting Offenders, Reasonably Overcoming the Resisting Prone Offender, Multiple Officers Takedowns and Arrest.

## High Risk Event Planning - “Tactical Operations Intelligence & Planning (TOIP)”

This is an advanced skill development course designed for professional currently engaged in tactical operations or initiating a tactical program, at the law enforcement or military level. During this block of instruction the student will receive a practical base of knowledge in the dynamics of tactical operations and techniques for successful management of related situations. Further, the attendee will receive training in the efficient and effective use of various tools and systems for mission planning and will operate in environmental conditions

similar to those experienced during actual callout or mission situations, to include; Organizational requirements, Intelligence gathering, counter-intelligence, Pre-planning, mission planning and support, and Operational planning/execution.

This is an advanced skill development course designed for the armed professional currently engaged in tactical operations or initiating a tactical program, at the law enforcement or military level.

## **Homicide and Death Investigation**

This Serious Injury and Death Investigations Course will address the critical components that police investigators must have experience in to professionally respond to, assess, investigate and successfully conclude investigations involving Death, Officer-Involved Shootings (OIS) and In-Custody Death Investigations.

The goal of this course is take a newly appointed investigator or soon to be promoted investigator and train them to a level where they will be able to successfully see a homicide investigation from the initial call to the prosecution of the offender.

The class will combine indoor and outdoor crime scene practical exercises, allowing students to demonstrate knowledge learned.

## **Incident Command System for Law Enforcement and Public Safety Agencies**

The goal of this course is to introduce the student to the history and development of emergency management and incident command. This class seeks to expand on that knowledge through the use of classroom presentations and participation with various tabletop simulator scenarios. The students are prepared to manage the various operational objectives of emergency management from a first responder or first line supervisor's perspective. Additionally, it is the goal of this course to expose the student to various scenarios and identified threats taken from current events and explore courses of action and the various impacts from those decisions. The course stresses the need for Unified Command to properly prepare an effective local, regional and national response to all types of threats and hazards.

This is an advanced skill development course designed for the first responder or first line supervisor, currently involved in public safety activities including law enforcement, emergency management, elected and appointed municipal officials, and other public safety representatives.

The scenario exercises begin with a basic incident with a single agency response, and progress to various multi-agency scenarios that require the implementation of the Incident Command System and its various components.

## **Individual Creative Thinking & Learning**

The goal of this specialized training program is to prepare the student to prepare, conduct, and manage productive and effective training programs and functions beyond basic level instruction. Additionally, the course is designed to

give the student instructor a practical base of understanding of advanced training methods like imagery, simulation, and psychodrama training. Further, the program is designed to provide a solid understanding of human nature and communication as it applies to learning and creative learning environments.

The course will be directed at a functional understanding of the principals of adult education, educational psychology, creative training approaches, and creative problem solving. Several areas will be addressed; each area by itself is an area of expertise requiring detailed individual course instruction.

This course is not a basic method of instruction or general instructor certification module. This program is an advanced program intended for those individuals who want to maximize their ability to effectively transfer knowledge to their students. In addition, this program is also designed to help participants increase their knowledge and application of curriculum development, program assessment, contemporary communication skills, learning techniques, and the development of decision-making skills.

The course contains improvisational speaking assignments so that the student returns from the training with a more concrete understanding of the application of the training material.

## Introduction to Computers for Law Enforcement

This highly interactive and “hands-on” course will develop applicable skills in the area of basic computer knowledge, software and internet capabilities.

The goal of this training program is to introduce law enforcement officers to computers, MS Office programs and the internet. The modules are developed specifically for the “computer illiterate / basic knowledge” student. We allow student to progressively learn at a pace that is non-threatening.

This is an introductory skill development course designed for the Law Enforcement, and prosecutorial personnel interested in learning computer skills related to identification, collection, preservation and investigation of forensic computer crimes and exploitation.

Note: Students will be engaged in multiple practical training labs during each day of instruction. The instructor will lead each day in the topical instruction, and then implement related practicum simulations at the student workstations.

## Latent Fingerprint Examiner

The study of the recovery of latent fingerprints from the scene of a crime is one of the most important avenues of evidence recovery available to modern day law enforcement. A single fingerprint properly recovered can make or break any important case. Repeatedly the police and prosecutors have depended on that best evidence, a Latent Fingerprint. Even more vital is the comparison of these recovered Latent Fingerprints with known standards, thus making the case and putting the criminal behind bars.

This course will explore the avenues of Latent Fingerprint Recovery, Comparison, and Court Testimony; utilize chemical and physical fingerprint identification techniques. Students will seek to find the many distinct characteristics possessed by each and every fingerprint; with emphasis on Latent Fingerprint processing techniques, and latent Fingerprint recovery techniques including photography and Latent Fingerprint comparisons with known standards.

This course will teach the general procedures that apply to all types of latent fingerprint identification, whether they are homicide, suicide, rape, burglary, robbery or arson. This is an intermediate to advanced skills development course designed for the law enforcement, crime scene technicians, latent fingerprint examiners, and investigators in the comparison and recovery of latent fingerprint evidence.

## Level 1 Tactical Operation - Basic SWAT

This is an advanced skill development course designed for the armed professional currently engaged in tactical operations or initiating a tactical program, at the law enforcement or military level. During this block of instruction the student will receive a practical base of knowledge in the dynamics of tactical operations and techniques for successful management of related situations. Further, the attendee will receive training in the efficient and effective use of various weapons systems in environmental conditions similar to those experienced during actual callout or mission situations, to include; close quarter's conditions, in and around vehicles and unconventional positions, deliberate & dynamic entry and movement, and the dynamic of hostage rescue operations. This program is presented in a contemporary and legally defensible format. Response skills will be developed through simulated force application situations and dynamic exercises.

## Mental Health/Excited Delirium Crisis Trainer

The goal of the training program is to "Train the Trainer" and prepare the sworn law enforcement officer, mental health officer, emergency medical responder, social worker, and hospital personnel to understand and identify the behavior, techniques, and proper/lawful procedures in handling persons in mental health crisis. This training will train personnel in the proper and accurate instruction of these topics. The training will also provide techniques in communication to de-escalate persons involved in difficult and dangerous situations. Law enforcement officers must learn to deal safely and effectively with people in a state of excited delirium and mental health crisis.

This course will give you the tools to save yourself, protect the suspect, and save your department from the liability associated with dealing with individuals and

will provide instruction and all the information needed to conduct this training yourself.

## Prescriptive Interviewing of Children - Sexual Assault

A customized course, primarily focused on the Prescriptive Interviewing of Juvenile Victims of Sexual Assault. This course will be specifically defined for law enforcement investigators, prosecutorial attorneys, selected first responders and emergency medical staff and social / protective service professionals. Course topics deal with prescriptive investigatory interviewing techniques of juveniles. Many of whom may have been a victim of, but not limited to:

- Sexual Exploitation / Sex Slave Trade
- Sexual Abuse
- Incest
- Rape / Sodomy
- Unlawful Sexual Activity
- Child Kidnapping
- Exploitation of Prostitution

## Property & Evidence Room Management

Enhance and develop skills for new property and evidence employees of large and small law enforcement agencies. Discover new techniques of packaging evidence and handling evidence issues. Learn proper evidence custody issues. Discuss the CALEA standards of property and evidence and document the right processes agencies in the class are conducting and discuss improper handling of evidence.

Upon completion of instruction of property and evidence training, students will be able to:

- How to properly collect and preserve evidence
- Importance of properly documenting evidence for chain of custody
- The importance of safety standards/OSHA regulations
- Have standards for property and warehousing of evidence
- Will have knowledge of state seizure laws
- Properly packaging valuables, currency and contraband
- Documenting the destruction of drugs and other contraband and proper procedure
- Correct way to handle loaded weapons, unloaded weapons

## Protective Service Operations - Level 1

This is an entry-level protective service course designed to train individuals in the theory and practice of protective service operations. The course, taught in a reality based format, will prepare students to avoid, detect and repel attacks upon principals. During this block of instruction the student will receive a practical base of knowledge in the dynamics of protective operations and techniques for successful management of such details. Further, the attendee will receive training in the efficient and effective use of the duty handgun, pistol and/or revolver in environmental conditions similar to those experienced during a protective service detail, to include; close quarters shooting, shooting in and around vehicles and shooting from unconventional positions. This program is

presented in a contemporary and legally defensible format. Response skills will be developed through simulated force application situations and dynamic range exercises.

## Pursuit Driving / Tactical Vehicle Intervention Trainer

The goal of the training program is to prepare Law Enforcement personnel to operate emergency vehicles under dynamic conditions, mitigate the increased possibility of accidents and provide them with useful skills beyond basic level driving skills.

Every day, drivers of virtually every type of emergency vehicle operate beyond the limits normally experienced by the civilian driver. The nature of law enforcement driving during emergencies often places extreme demands on both the driver and the vehicle.

This program will teach drivers to avoid the types of accidents most often experienced in the line of duty and operate emergency vehicles safely under dynamic conditions. The concept of safe performance driving is taught both in the classroom and on the driving range.

This course is not a basic method course of instruction. These programs are advanced instructor development programs intended develop train the trainers to increase their knowledge and application of performance and safe vehicle operations during high stress pursuit conditions. Additionally, maximize their ability to safely and effectively deploy mechanical vehicle disablement devices (stop sticks) under dynamic conditions and the performance in safe traffic stop operations.

## Rifle / Carbine

This is a practical skill, instructor development course designed for the armed professional currently engaged in street patrol or tactical operations within the law enforcement or military police community. During each block of instruction the student will receive a practical base of knowledge in the dynamics of the Police Rifle/Carbine, its nomenclature, and techniques for successful transportation, carriage and use during a potential high-risk situation. Each attendee will receive dynamic practical training in the efficient and effective use of the rifle/carbine in environmental conditions similar to those experienced during actual performance of law enforcement duties, to include movement, cover, reduced light, incapacitation and shooting positions. This instructor certification program is presented in a contemporary and legally defensible

format. Response skills will be developed through simulated force application situations and dynamic exercises

## Search & Seizure

Application of the Fourth Amendment of the United States Constitution to the Duties and Responsibilities of Law Enforcement Investigations

This course will emphasize the theory behind the Fourth Amendment as well as its evolution through statutory and common law adaptation. The attendees will understand not only what the Fourth Amendment is, but why it is important to our system of justice. Attendees will participate in hypothetical scenarios that will enlighten them regarding the veracity of evidence gathered in accord with the requirements of modern day search and seizure law.

This block of instruction will give the participants the ability to distinguish between bare suspicion, reasonable suspicion and probable cause so that the participants can adequately identify the limitations placed upon their actions as it relates to the level of suspicion, articulable at the time of the investigatory action.

- The goal of this course is to provide a working knowledge the Fourth Amendment to the United States Constitution.
- The “hands-on” aspect of the course will expose students to situational simulation that will require the student to apply the current law of search and seizure to various investigative scenarios.
- Participants will be required to create “go bys” for the required judicial and departmental applications required in the obtaining and execution of all types of warrants.
- Each attendee will have a broad based understanding of the requirements of the law surrounding search and seizure and will be capable of analytical evaluation of those principles when applying them to new and differing problems that arise during their investigations.
- Emphasis will be placed upon the importance of the sound foundation of each investigation. Officer’s at the most basic levels will understand their role as a first responder to insure that their initial actions do not taint the investigation going forward.

This course is designed to enhance the relationship between all levels of investigation by understanding the importance of the respective duties of officers from patrol through the highest levels of sophisticated investigations.

Therefore, officers assigned to routine patrol, investigators, crime scene technicians, supervisors and prosecutors will all benefit from the information and practical approaches addressed in this course.

## Sexual Assault Investigation and Rape Typology

The goal of the training program is to prepare the Investigator and Investigative Supervisor to conduct and manage a Sexual Assault or series of assault investigation(s) from initial response through needed follow-up.

In addition, the course will include an intense overview of criminal behavior and the understanding of behavior as it relates to the traditional forms of evidence, i.e., forensic, circumstantial, eyewitness and confession.

This course is intended for various experience investigators, evidence technicians, supervisors, and prosecution attorneys. It also has great value to the patrol officer and new recruit. The intent of the trainers is to bridge the learning gap obtained throughout a law enforcement career in the area of evaluating crime scenes and help the less experienced officer/investigator to avoid many of the mistakes and pitfalls experience by veteran officers as they progressed in their individual careers.

## Street Gangs and Organized Crime

This course will teach those in the criminal justice profession a basic Gangs 101 approach to national and local gang trends, definitions, gang mentality, why people join gangs, how music affects gang activity, and the different types of gangs, which include Hate gangs, Outlaw Motorcycle gangs, Prison gangs, Hispanic gangs, African American gangs, Asian gangs, and White street gangs.

The goal of this training program is to provide the student with basic gang awareness, which will give the student the ability to identify and understand gang graffiti, gang symbols, gang language, and basic interviewing techniques. The course will also include Russian and Nigerian organized criminal activity. The course will stress officer safety techniques, plus introduce intervention, prevention, and suppression methods.

This is an informational development course designed for the law enforcement, correctional and Prosecutorial professionals. Students are encouraged to participate in detailed discussions.

## Successful Encounters with the Mentally Ill

Emotionally disturbed persons are a law enforcement problem. Law enforcement officers, sworn to protect and serve them, sometimes need to take them into custody for their own protection. Law enforcement officers must also deal with people who are mentally ill who commit crimes, including bank robbery, arson, child abuse and attacks on peace officers. Law enforcement officers must learn how to win encounters with emotionally disturbed persons, which means ensuring that the subject is taken into custody safely.

The goal of the training program is to prepare the sworn law enforcement to do the following: recognize the symptoms of different types of mental illness; learn guidelines for contact with mentally ill people; understand words and phrases and principles of active listening; familiarize with the "Suicide-by-Cop" phenomenon and its implications for law enforcement officers; properly document (report writing) encounters with mentally ill people; manage

encounters with persons in a state of excited delirium or cocaine psychosis; identify the symptoms of a potential victim of sudden custody death syndrome; properly use the hobble restraint, an alternative to the dangerous “hog-tie” method

This course is intended for various levels of experienced sworn law enforcement officers and related personnel. The intent of the trainer is to provide survival tools and recognition techniques so that the student can effectively respond to the emotionally disturbed person’s needs, while providing information geared toward officer survival in these types of encounters.

## Suicide Terrorism & Bomb Security

The goal of the training program is to counter Suicide Bombers; identify Suspicious People/Activity; Bomb Detection and First Response Guidelines. We believe this course is for all areas in law enforcement, security, fire personnel, emergency first responders and command staffs.

This course will deliver comprehensive information on the threat of suicide/homicide terrorism, identification of bombs and their components; profiles of bombers, components and tendency; guidelines to counter the threat; tools to prepare courses of action for first responders.

## Tactical Communications and Debriefing

This course emphasizes basic communicable and debriefing skills while approaching someone in a vehicle, street stop, or inside the interview room. The goal of this training program is to provide the student with the ability to communicate in potentially dangerous situations verbally. This course will stress techniques to diffuse difficult and hostile people, and re-direct their energy into a positive conclusion.

This is an informational development course designed primarily for law enforcement, but can be effectively utilized by corrections personnel, parole and probation officers, prosecuting attorney’s, and anyone within the criminal justice system. Students are encouraged to actively participate in detailed discussions and role playing exercises.

## Tactical Handgun

This course is specifically designed for the existing law enforcement, private security, or military firearms instructor who may require an enhanced knowledge of the combat handgun and its applications in critical, real world situations. Additionally, this course is designed to provide a solid understanding of adult education and methods of instruction as they

pertain to the field of firearms and force application. Students will also learn acceptable and legally defensible methods of subject control, use of force, and weapon retention. Practical application exercises are combined with

stimulus/response conditioning principals and the development of a winning mindset.

## **Tactical Shotgun**

This course is specifically designed for the existing law enforcement, private security, or military firearms instructor who may require an enhanced knowledge of the combat shotgun and its applications in critical, real world situations. Additionally, this course is designed to provide a solid understanding of adult education and methods of instruction as they pertain to the field of firearms and force application. Students will also learn acceptable and legally defensible methods of subject control, use of force, and weapon retention. Practical application exercises are combined with stimulus/response conditioning principals and the development of a winning mindset.

## **Use of Force and Use of Deadly Force**

A critical knowledge domain course for street officers, police supervisors, instructors, middle management, and executive leadership positions within law enforcement, corrections, as well as Civil and Prosecuting Attorneys.

In the world of policing, the statistics tell us that an officer responds with force in fewer than three of every one-hundred arrests. However, the media's focus on this subject magnifies every force event in the awareness of the public. The courts and US public are generally supportive of the police when officers act in a reasonable manner in the face of resistance, aggression, and assault. However, the public demands a greater level in the ability to articulate those force decisions by the involved-officer(s) in order to demonstrate that reasonableness.

The goal of the training program is to prepare the sworn law enforcement officer to do the following: to competently face criminal defense and Plaintiff's attorneys when defending his/her force response; to pass a written examination on force law, and to discuss the laws of force professionally when called upon during testimony; become conversational regarding the signs of aggression, officer-subject factors, and threat recognition; to write a well-documented, legally defensible force narrative report; learn what elements must be included in force reporting dealing with different types of force; to understand the need for and the proper collection of evidence in order to prove the facts while creating a defensible case; understand the mechanics of reviewing the report for criminal, civil and administrative content.

This course is intended for various levels of experienced sworn law enforcement officers and related personnel. This course has a proven track record of creating change in the law enforcement audience. Officers are better able to make reasonable decisions in the field through their knowledge of and certainty through the law, and demonstrate greater certainty through the understanding of how to articulate and justify their actions in the field through their documentation of the event.

## (V.e.S.T.) Vehicle Stop Tactics

This class will teach vehicle stop tactics that you can wrap around you like your body armor. Like your vest, they may save your life and save your career.

The goal of the training program is to instruct sworn law enforcement officers in the following: assessment of risks and threat cues by drivers and passengers; safe positioning of police and violator vehicles; safe methods for approaching vehicles and making contact with driver/passenger; how to stop and approach vehicles other than passenger cars; case law regarding vehicle stops; safe methods for conducting “felony,” or high-risk stops; procedures and law regarding vehicle searches and how to safely conduct them; how to avoid citizen complaints and conflict with violators; and risk factors that must be considered during a vehicle pursuit, which often begins with a traffic stop. This course is intended for various levels of experienced law enforcement officers, supervisors, command staff and other sworn personnel. The intent of the trainer is to provide survival tools and recognition techniques so that the student can safely conduct unknown- or high-risk vehicle stops, minimize conflict and take violators into custody safely. This course includes the use of dynamic scenarios employing Simunitions or paintball combat to make the training as street-real as possible, to challenge the students, to reward “winning” behavior and remediate deficient tactics.

## Winning, Use of Force

A critical thinking course for street officers, instructors, first-line, middle management and executive leadership positions within in law enforcement, correctional, and prosecutorial attorneys.

The goal of the training program is to prepare the sworn law enforcement to do the following: be able to “walk the walk” as well as “talk the talk” on use of force, familiarizing with contemporary use of force case law and its implications for law enforcement; be able to discuss use of force intelligently, on paper and on the witness stand; learn what tricks attorneys use to trip up law enforcement officer-witnesses; familiarize with signs of aggression; how to overcome confrontational stress and its effect on how the officer recalls the incident; writing a well-documented, legally defensible use of force report; learn what elements must be included in reports dealing with different types of force; mechanics of report review.

This course is intended for various levels of experienced sworn law enforcement officers and related personnel. The intent of the trainer is to provide information relevant to surviving a use of force incident and its aftermath in court and throughout the legal system, which can sometimes be more taxing than the use-of-force incident itself.
